

Photography Guidance

The theme for the photography contest is 'Our School'. We would like you to take pictures of your child around the school grounds or in the building. We would encourage using the vast school grounds as much as you can (especially if the weather is nice) but the library, hall, school entrance and corridors are also available. We would ask that no classrooms are used for photos.

Due to confidentiality, could you please make sure you only take photos of your child and ensure no other children are in the background of your photos. Please use your own device to take as many photos as you like and then you can decide after the session which single photograph will be your entry.

Please be as creative as you like with your art but we would like you to think about incorporating 'school life' as much as possible, e.g. a child reading a book or a child playing amongst the trees or perhaps doing something fun. In addition to this we would like you to try and incorporate one of the ideas below into your photos. These categories are:

Action

- capturing and conveying motion in your pictures
 - a blurred aspect to convey movement

Humour

- You and your child conveying humour through your photos through expressions, actions, props or positioning

Introspection

- Adding an emotional or sentimental aspect to your art which conveys inner emotions or personality.
